Yes Radio Station North West what ever happened to that antenna?
A company that I worked for we designed and built several receivers
AN/FRR-87 for the Navy sites, North West, Spain, Iceland, Japan,CA,HI, and
another place I can't recall now. I was the engineering for the North West
install very TS inside.

Does anyone have a 1921 to 1924 callbook that can lookup 9AJE ?

My 1920 callbook shows 9aaa through 9acx or so, so I think 9AJE was
issued within the next two years.

I'd appreciate any information you could provide.

Does anyone have a 9AJE QSL card?

I recall seeing one in Northern Scotland near Montrose in the mid-80's.
It was an operational site and had a feeling it was run US Navy and
another well know agency.
Extremely neat antenna for it time.

Imperial Beach, CA. IB is just down the road a bit from home, first time
there was in the '60s.

Montrose, Scotland. I did not get to this one but my friend Doug WA6VOV was stationed there.

Chicksands, England. Worked at Chicksands in the late '80s. Chicksands was a beautiful base.

Augsberg, GE I went to this site several times in the early-mid '90s. I liked Augsberg and the surrounding territory.

Just a "poll".
Who is planning to be at Belton this month?
I will be there in the morning for a while then QSYing to a private picnic about 15 miles to the west. May bring some stuff with me to peddle.
Don't quite know if I will yet.
Looking forward to meeting some of you guys there.

I've been to all the Navy CDAA sites when I was facilities planning
officer for the NSG command from 1974-1977. The website I shared
earlier has all of them listed in various orders, including their
ultimate disposition - http://www.navycthistory.com/

Edzell (Scotland) was my favorite - perhaps because of the superb single
malt Scotch at the local hotel for TDY travelers.   :-)   Didn't
appreciate feeding the heater in the room with coins at 0200 of a
December morning, though.

There are similar sites for AF and Army activities of the era.

73,
Mike

Content-Type: text/plain; charset=ISO-8859-1; format=flowed
Content-Transfer-Encoding: 7bit

In the 1960's I was a Tech Controller at the Bullseye Sites
on Guam and Imperial Beach.

Here's some information about the CDAAs from the former
Executive Officer of the Imperial Beach site.

http://coldwar-c4i.net/CDAA/history.html

These sites had a number of uses. One of them was to

catch the burst transmissions from Soviet block submarines.

At I.B. site was used to capture information used to create
an electronic order of battle for the armed forces
of various target countries.

At the time I was there, the I.B. site had position located
outside of our SECGRU spaces that was used by the FCC
for cutting bearings on signals of interest to them. Other sites
may have had similar setups.

The Pacific was divided up into the Eastern HFDF Net and the
Western HFDF Net. Guam was alternate Net Control for the
Western Net and Skaggs Island was the Alternate Net Control
for the Eastern HFDF Net. The Eastern HFDF Net included
a Canadian CDAA. The site at Hawaii straddled both nets.

The old Clark AFB antenna has apparently been converted
into some sort of outdoor theater.

http://maps.google.com/maps?
q=manila,philippines&ll=15.204749,120.527980&spn=0.008272,0.015533&t=k&hl=en

As more and more communications migrated up the frequency band,
these HF sites became less and less important and fancy space based
equipment came to take over the missions of these old sites.

I hope to visit the operations building and the WWII transmitter building
at Skaggs Island if the rain ever stops.

Cheers,

Edzell (Scotland) was my favorite - perhaps because of the superb single malt Scotch at the local hotel for TDY travelers.

..I never learned to appreciate the , said marvelous, single malts but I do like the local bitter. Doug Dilley WA6VOV, retired co-worker and ex CT, learned the malts well while at Edzell/Montrose. I've told several folks that when I retire I want a FLR as my going away present. OK...21 year old single malt is definitely a BoatAnchor tipple...kind of the 813 rather than the cold 807. MIME-Version: 1.0
Content-Type: text/plain;
charset="iso-8859-1"
Content-Transfer-Encoding: 7bit

I am corresponding with a ham who has an Eldico TR-1 cabinet rack version also known as a TR-1TV.

I found him a manual but he needs a schematic. This is the standard issue TR-1 with a single 813 final and a pair of 811's (not A's) for the modulator. This is not the separate component unit but mounted in a factory cabinet rack.

He duly noted that the Rf deck is quite husky (more so than his Globe King 500). So he is also interested in anyone who might have converted it to a 4-250/ or 4-400 and upgraded the modulator to 811A's. I do recall one fellow added a second 813.

I will forward all replies to him.

If you have a Harbor Freight near you, look at their router speed controller-for $12.95. I think this would come in handy for an iron heat controller. I built one years ago with a wall dimmer switch in a double receptacle box.. I'm sure it would cost in excess of the price of the Harbor Freight unit just for parts to build one now.

Not thermostatically controlled, but it does the job.

I'm risking banishment, I know.

6265092168 at U-know-where.

Also worth a 2nd look, it's been a while.

And if you want to try building one in your own back yard, helpful hints can be found in TM 32-5985-217-15
"OPERATOR'S, ORGANIZATIONAL, DIRECT SUPPORT, GENERAL SUPPORT, AND DEPOT MAINTENANCE MANUAL FOR ANTENNA GROUP COUNTERMEASURES RECEIVING SET AN/FLR-9(V7)/(V8)"

This TM is on line at
http://kahuna.sdsu.edu/~mechtron/PremRxPage/ref/wullenweber.pdf

Cool!

Better look while you can;
there's a swaztika visible in the listing, so the
P.C. folks at Ebay are going to pee their widdle panties
and yank it just as soon as the first whiner whines.

D.S.

That's San Diego State & you know the big kahuna, right? If not, write
A. Funicello re beach party characters. Or just open
http://kahuna.sdsu.edu & see the guy.

Ya know there was one of them wolleybooge critters north of SDSU on CA-1.
I sure remember passing it on the train (coast daylight)at least once.
In fact, by goofy coincidence, I did a post on another reflector noting
there'd been a wolleybooger at "surf city." Answer came back qth was
Imperial Beach.

So the web site belongs to one mech/ee prof ham named Greg Bailey but
doesn't answer my question as to whether US DOD gave FLR/9 site to SDSU.
Bet so.

Back to these parts.

Uhhhhh. Who bought the one @ Shelby in '03?

   'rm

Anybody in the Chicago area willing to help a friend troubleshoot his =
mostly nonworking National NC-300? His name is Mead Killion, email =
abonso@aol.com.

Thanks.
